## **Quality Control, La Trappe Brewery, The Netherlands: “Old meets new” with Nordic ID Morphic & Scanology**

Nordic ID partner Scanology has delivered a Production Quality Control system using the Nordic ID Morphic platform to the La Trappe De Koningshoeven Abbey Brewery, just outside the village of Berkel-Enschot in the south of The Netherlands.

La Trappe ([www.latrappe.nl](http://www.latrappe.nl)) is one of only seven Trappist breweries in the world permitted to carry the logo "Authentic Trappist Product", which guarantees authenticity and tradition.

Until recently, La Trappe checked and logged the various critical phases of their production using a labour intensive paper-based system.

La Trappe commissioned Scanology to automate the data capture and management reporting processes using the ScanEasy solution on the Nordic ID Morphic platform.

The solution delivered has given a quick return on investment from greater productivity and improved process information.

Scanology developed the ScanEasy package to provide a total solution for scanning, printing, stock-taking and price control, suitable for rapid, low-cost deployment in all sizes of company. ScanEasy accepts data from barcode, RFID and keyboard/screen sources.

ScanEasy is offered as a stand-alone package and also in starter sets which provide out of the box solutions to common business inventory and labeling challenges. Learn more by downloading the [ScanEasy pdf](#).

The Nordic ID Morphic represents the next generation of handheld terminals. Compact yet powerful, the Morphic's robust ergonomic design and intuitive browser based user interface speeds shop floor adoption.

The Morphic is highly versatile, providing data capture, display and transmission in one device, reducing cost and training time to deliver fast ROI. Fitted with a barcode scanner, the Morphic is upgradeable to RFID. Learn more about the [Morphic here](#).

### About [Scanology](#)

Scanology is a leading European AIDC Solutions provider, with an extensive history and knowledge of Barcode and RFID technology. Scanology provides a full service from consultancy and project design through delivery of hardware and software to complete systems installation. Based in The Netherlands, we have partners in 26 countries across the world. Independent and independently minded, we design and deliver the systems the client needs to meet their current and future business objectives.

### About [Nordic ID](#)

Originally a small engineering company, Nordic ID, based in Salo "the mobile ID valley of Finland", has grown to be one of the main providers of handheld terminals and computers for retail and industry, with customers such as WH Smith, Spar, Coop, Adidas and Kaiser's Tengelmann. Every morning between 8 and 9, over 2 million retail transactions are processed by Nordic ID handhelds. Annually the company supplies over 10.000 products that use the latest wireless and mobile telecommunications technology.
